In today's food service environment, getting rid of hot water, grease and organic waste is very challenging. Proper drainage system in place is very important since inception of project. Failing to do so creates problems like drainage blockages, foul smell, unhygienic working condition, food contamination, etc. Install commercial drainage solution which optimises food safety, health and safety of employees and the protection of water.

HYGIENIC PERFORMER

DRAIN TROUGH

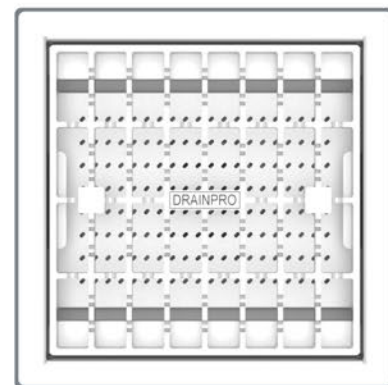

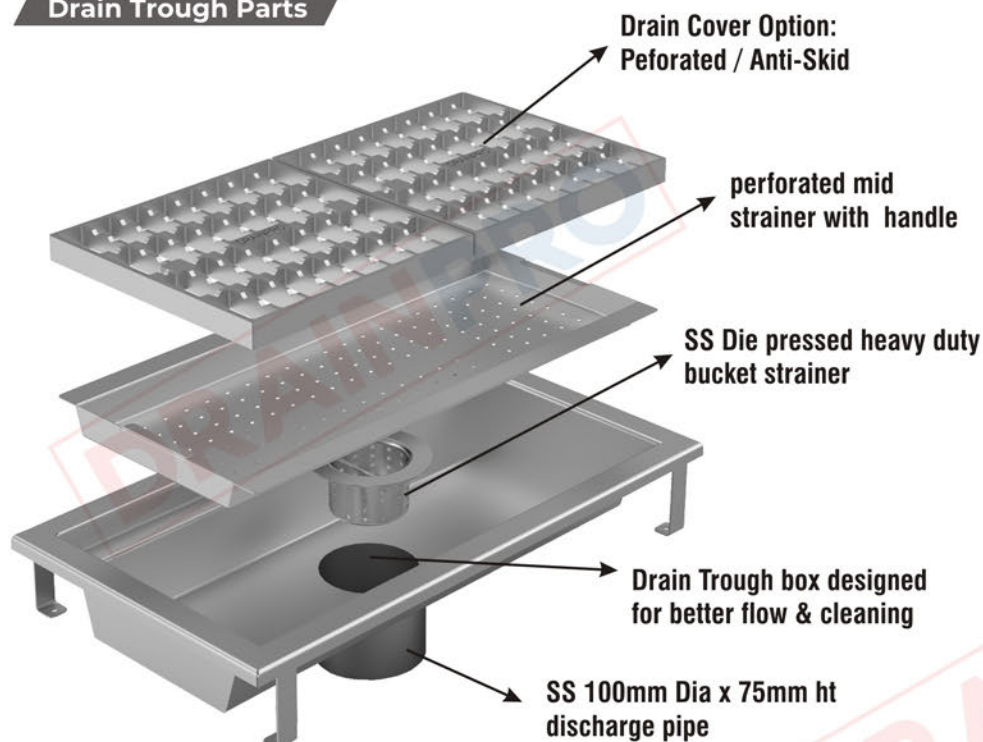

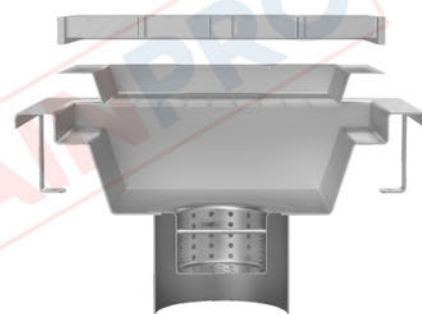

ANTI-SKID COVER

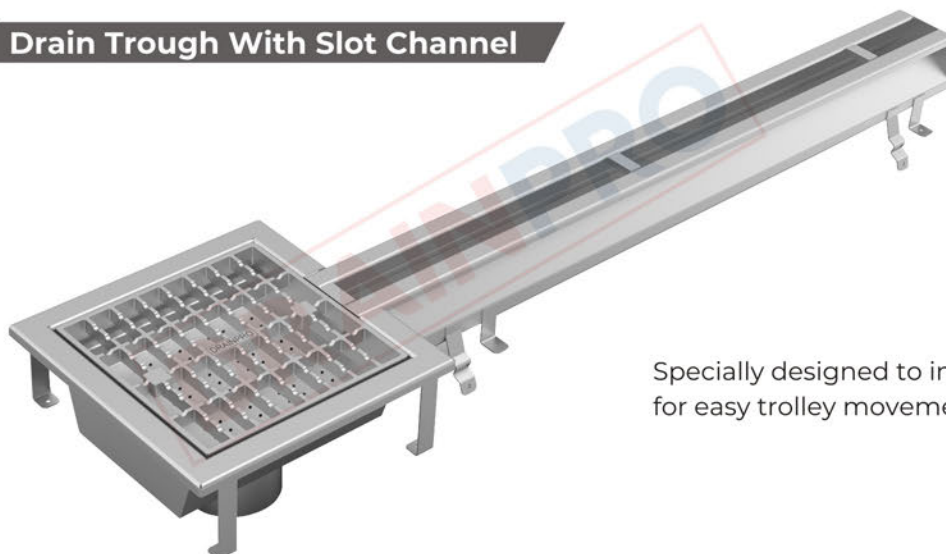

PERFORATED COVER

Drain trough is used for drainage of water on floor. It is grouted in floor during civil work and pipes are connected to bottom of trough. It is highly effective and proven product for drainage. It enables hygienic work environment, odour free kitchen, easy water drainage, and blocks soiled food particles. It is majorly used as point drain system. Drain trough is made from all Stainless Steel corrosion free material & provides 3 stage filter process.

Elevate Your Drainage System with DRAINPRO's SS Casting Anti-Skid Grating: The Ultimate Solution for Busy Kitchens

At Drainpro, we are dedicated to setting new standards in drainage solutions with our latest innovation: the SS Casting Anti-Skid Grating. Engineered to meet the demanding conditions of busy kitchens in hotels, restaurants, and cafes, this state-of-the-art grating delivers exceptional performance and a range of benefits.

Benefits:

SEAMLESS CONSTRUCTION

Made from a single piece of cast stainless steel, our grating eliminates the need for welding or joints, enhancing structural integrity and reducing potential points of failure.

UNMATCHED DURABILITY & STRENGTH

Crafted for resilience, the SS Casting Anti-Skid Grating withstands heavy foot traffic, high temperatures, and frequent spills, ensuring long-lasting performance in commercial kitchens.

ENHANCED SAFETY WITH ANTI-SKID DESIGN

The advanced anti-skid surface significantly reduces the risk of slips and falls, even in wet or greasy conditions, promoting a safer and more secure working environment.

AESTHETIC APPEAL AND VERSATILITY

With its sleek, modern design, the grating not only performs exceptionally but also enhances the visual appeal of any kitchen. Its versatile design allows for seamless integration into various drainage systems.

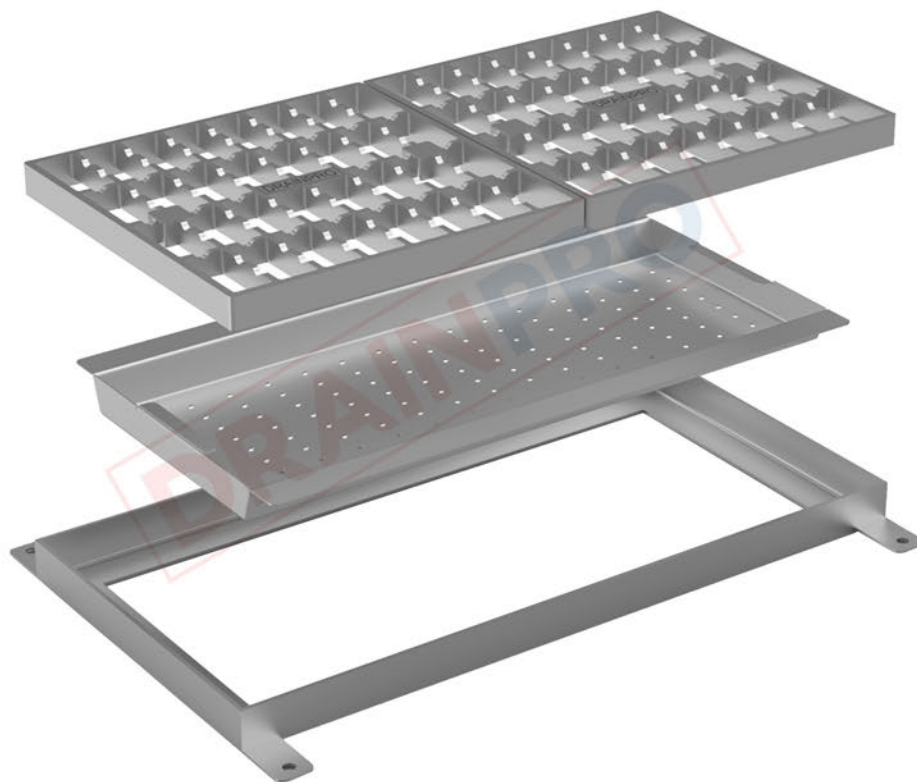

HYGIENIC PROPERTIES

Stainless steel's non-porous surface prevents the buildup of bacteria, supporting a cleaner and more sanitary kitchen environment.

With its unparalleled durability, superior safety features, and elegant design, Drainpro's SS Casting Anti-Skid Grating sets a new benchmark in drainage solutions. Upgrade your kitchen with Drainpro and experience the benefits of advanced engineering and exceptional quality.

TRENCH COVER is used for discharge of water where in drain trench is made from civil work and top is closed with Steel drain covers.
